Write your own postcard from Pluto

In 2006, NASA launched a spacecraft called New Horizons – the first ever unmanned mission to Pluto. New Horizons captured amazing images of Pluto's icy surface, glaciers and snowcapped mountains. Imagine if *you* were on a space mission to Pluto, what would you write on a postcard back to Earth?

Hey all-
Well, after a LooooooooNG journey, I finally made it to PLUTO! Freezing - but beautiful. Wish you were here!
